

FM50 FOAMER

FM50 Foamer

The FM50 Foamer is an air-operated foaming machine that makes a rich, shaving cream like lather, perfect for disinfection and cleaning.

When used with an outside air source, the Dramm Foamer creates an adjustable foam that slowly dissipates, allowing proper oxidation and disinfection to occur.

Mounted on a rugged, vinyl-dipped cart with a plastic 50 gallon tank, the Foamer is designed to hold up to harsh detergents and corrosive chemicals. Rubberized casters and wheels make the FM50 maneuverable and hold to wet concrete surfaces. The unit comes standard with 25 feet of 1/2" hose and a foam gun. Other hose lengths are available.

Specifications

Power Supply - Air driven
Air Requirements - 60 PSI @ 3CFM /25 ft. Hose
(more required for longer hose)

Tank Capacity - 50 gallon, 189 liter
Hose Length - 25 ft. standard
50 ft. and 75 ft. optional
