

MSO Heavy-Duty Sprayer

The MSO provides a fine spray that covers surfaces evenly. With variable pressure up to 500psi, the MSO has a lower spray volume than many sprayers, resulting in finer droplets with less run-off. Perfect for the application of insecticides, fungicides, plant growth regulators, biopesticides and sanitizers, the MSO is a small workhorse.

Using our durable MSO pump, the MS20 and the MSO PRO include our narrow, 20 gallon cart and tank and our unique convex reel. Our narrow cart fits down most aisles to allow access throughout the growing area. Our convex reel prevents snagging of the hose making spraying easier.

The MSO PRO includes these features adding a pressure gauge and our vertical-flow agitation system.

The MSO comes with our MS-TG spray gun that provides an adjustable, conical spray that can range from a fine, turbulent mist to a straight stream. With our water-stop quick connect, you can easily switch to the optional L-5 lance for a directed spray for hard-to-reach areas.

The MSO comes standard with solid rubber tires. The Optional BigFoot™ upgrade uses larger pneumatic tires and casters for rough terrain.

| Specifications | |
|--|--|
| Tank Capacity- 20 gallon | Spray Output- 0.5 gpm |
| Agitation Output- 4 gpm | Max Pressure- 500psi, Fully adjustable |
| Power- 120v AC 200 watts | PumpType- Piston, high pressure |
| Hose Length- 100ft w/quick connect | |
| Dimensions (LxWxH)- 37" x 21" x 42" | Dimensions BigFoot (LxWxH)- 37" x 27" x 42" |

- Features on **ALL MS20** units
- Features on **MSO PRO ONLY**
