

PRESSURE COMPENSATED DRIBBLE RING

S3 Anchor
Holds ring in place
(optional)

Microvalve

Optional, individual shut-off

Different lengths
and diameters

PC Ring

Dramm PCR Pressure Compensated Dribble Rings offer accuracy with even watering, spreading the water around the container or root ball.

Great for larger containers, B&B Nursery stock or containers with more coarse media, PC Rings use a removable, perforated ring to distribute water throughout the pot. The ring separates at the T to allow for easy installation and removal.

Our PC Rings utilize our larger body design PCAS emitters for accuracy and a reduction in clogging. These emitters have a controlled output that will remain consistent from 15-50 psi. PC Rings are available in 1 gph, 2 gph, and 3 gph versions.

Specifications

Available Ring Diameters: 4", 6", 8.5", 10", 13" Required Pressure: 15 – 50psi

Available Leader Tube Lengths: 12", 24", 36", 48"

Available Flow Rates: 1 gph (4lph), 2 gph (8lph), 3 gph (12lph)
